Let's learn from each other.

Irish Schools

## Let's Discuss.

Where do you see your upgraded technology taking your school?

Do you believe it will benefit the learning process? Or are you concerned about it's potential to distract in a classroom or negatively impact basic literacy and numeracy? Will your school require assistive technologies?

Have you begun your journey into educational technology? What do you view as the strengths and weaknesses so far?

Client or not, we would love to hear about your experiences with the ICT scheme, so we can aid and assist in creating a smoother process.

Let's work together to ensure that technology has the opportunity to reach it's full potential from the outset.

## Questions&Answers

Month by month we would love to help schools communicate regarding their experiences with educational technology, and where possible, help it improve. No matter your source, we would love to discuss your difficulties or innovations, to promote the opportunities afforded to our schools by the ICT grant scheme.

### Who we are.

[iPads4schools.ie](http://iPads4schools.ie)

With three locations in midlands Ireland, Futuretech Repairs LTD. have been operating as a "one-stop shop" for all possible technology requirements, for any clientele, the country over and abroad.

Highest quality stock from smartphones and tablets, to secure charging trolleys and projectors and everything in between. Highest standard repairs by highly qualified and experienced technicians at unrivalled prices.

Our unrivalled corporate and public relationships, as with Co. Councils, Libraries, and companies nationwide are now being offered to our schools.

Contact: [brian@ipads4schools.ie](mailto:brian@ipads4schools.ie) for any information on procurement or to have your experiences addressed in our newsletters
